1/ Excludes statutorily exempt FTEs funded through Cooperative Research and Development Agreements (CRADAs) from FY 2002 through FY 2008. CRADA funded position FTE are tracked beginning in FY 2009.

2/ PHS Trust (Gift) Fund and CRADA-financed positions are reported within the IC direct FTE lines by the HHS Business Intelligence Information Systems (BIIS). CRADA and PHS are, therefore, now identified as non-add entries. The exception to non-add treatment of PHS Trust Fund FTE is in FY 2013 with the 4 FTE are additive.

3/ The FY 2012 NIH Congressional Justification (CJ) FTE table identified the total FY 2010 actual usage at 18,362 versus the BIIS reported figure of 18,351 primarily due to the additional reporting of CRADA as PHS in FY 2013.

4/ The FY 2013 NIH CJ FTE table identified the total FY 2011 actual usage of 18,569, however the IC distribution reflected in that CJ has comparability adjustments to retroactively account for the assumed effect of the NCATS reorganization. The IC distribution in this table reflects actual results as reported by BIIS for FY 2011 respectively.

5/ The average annual FTE cost includes total compensation and benefits (object classes 11 and 12). Benefits for former personnel are excluded (object class 13) as a non-recurring cost from the calculated average. Earlier versions of this table indicated average cost for FTE inclusive of benefits, however, the numeric values displayed identified annual average salary, which did not include benefits or non-salary forms of compensation.
